

Universal Stringing Rollers

5902 Straight Roller

A multi-position roller with adapters and fittings for a wide variety of conductor stringing applications

The No. 5902 Straight can be suspended using any of three suspension fittings shown on page 5. It can be mounted on a crossarm vertically, or at 22 1/2°, 45°, 67 1/2° or 90°. It can also be mounted on vertical or horizontal insulators, or on fiberglass arms or brackets.

The spring loaded positive latch is on the same side as the hinged keeper, which allows the roller to be locked from one side. The keeper may be latched in the open or closed position. Ultimate strength in suspension is 12,000 lbs. with the keeper open or closed. It can be furnished with a permanently bonded conductive neoprene lined sheave.

Materials are lightweight, high strength 356-T6 aluminum alloy, with stainless steel or cadmium plated steel parts. Sheaves are mounted on double-shielded, lifetime lubricated, maintenance-free ball bearings. Weight is 9 1/2 lbs.
