Flex-Eye Heavy Duty Grip and Flex-Eye Multi-Grip

Here is a powerful grip for pulling big conductors and will travel smoothly through travelers. It is made of triple-woven, highest quality, flexible, aircraft strand steel, integrated with a new flexible eye. The eye itself is composed of braided strands (rather than being rigid) to give it maximum flexibility in going around angle pulls or through small openings. Strands of the grip are retained at the head by a stainless steel spring, eliminating a rigid compression sleeve.

For support and pulling of different size cables from one flexible eye. This gives complete support for each conductor, where supporting a bundle is not desirable. Used in conjunction where severe vibration may be encountered i.e., mine shaft, industrial, adjacent to heavily traveled freeways.

Cat. No.	Size Range	U.T.S. (Lbs.)	Work Load (Lbs.)
8040	1/4" - 1/2"	6,000	1,200
8041	1/2" - 7/8"	12,000	2,400
8042	7/8" - 1 3/8"	28,800	5,700
8043	1 3/8" - 2"	48,000	9,600
8044	2" - 2 3/4"	57,600	11,500

Illustration shows Flex-Eye Grip with

8050	3/4"-1 1/4"	Single Weave
8052	3/4"-1 1/4"	Double
8054	1 1/4"--2"	Triple Weave

Weave When ordering please give sizes and number of conductors to be supported.
